

Processing

be vs TX Processing

Each card houses the history of purchases and relationships within different levels. And for the system to continue to function properly, each payment must reach its corresponding party on time.

be ys TX Processing

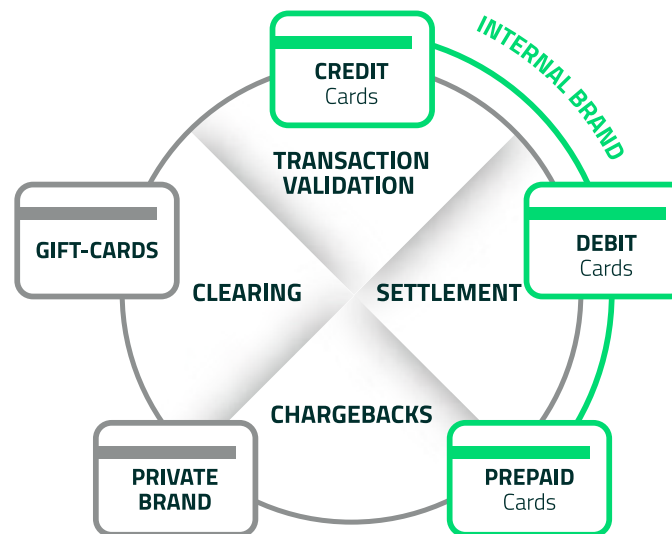

The financial compensation solution

At **be ys Pay**, we make our own financial compensation system available to the bank. Through our software, we can connect to various payment methods to validate, compensate and claim transactions quickly and safely.

■ FLEXIBILITY TO ADAPT TO ANY PAYMENT METHOD

Developed with flexibility in mind, distinguishing **be ys Pay** to the rest payment sector. Our clearing can connect both to the international systems as well as process transactions domestically. This allows us to adapt to the type of financial operation.

This flexibility is also reflected in the types of cards we can process.
